MUSEO

LA SPECOLA

firenze

The Museo La Specola is a museum of zoology and natura history which is located at the Florance, one of the beautiful cities in the world. It has deep ties with history; parts of the collection can be traced back to the Medici Family. There are lots of different information about scientific and medical stuff.

Today the museum spans 34 rooms and contains not only zoological subjects but also a collection of anatomical waxes, an art developed in Florence in the 17th century for the purpose of teaching medicine. This collection is very famous worldwide for the incredible accuracy and realism of the details, copied from real corpses.
